I haven't made it all the way through the write up on what they did but that would be good to know for future reference. I guess we are too far into it now. On the bright side (?) maybe EDFs data pull can fill in for the regions that aren't on the workgroup but where we have reports.

Interesting. R8 sent their interim report to me late yesterday. They are about 3/5 way thru with 1200 lines of entries. Many of the well sites are lacking well ids as well...I wonder if EDF had a better extraction methodology than we do (open, find, cut and paste).

Marcia,

I'm finally catching up on files and thought this might be helpful on our compliance report analysis. The link below takes you to EDF's comments on OOOOa. The last attachment is the raw data from CEDRI on wellsite fugitives. It has over 2,000 entries.
